## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see pages 12-22, filed 25 November 2008, with respect to the rejections of the claims under 35 U.S.C. § 103(a) have been fully considered and are persuasive. The rejections of the claims under 35 U.S.C. § 103(a) have been withdrawn.

While, as discussed on page 13 of Applicant's arguments, Ishida (US-4,437,378) does not teach the creation of the printed representation of the time-based media (namely, the music), such a creation must necessarily have occurred in order for the printed representation taught by Ishida to exist. However, Examiner agrees that the combination of references set forth in the previous office action of 25 August 2008 does not fully teach the disputed limitation "the printed representation includes a representation of the time-based media at a plurality of times thereof and a plurality of bar codes that associate time locations within the electronic representation with the plurality of times represented in the printed representation" as recited in claim 1. Particularly, the association of various time points between the printed representation and the electronic representation is not taught by the previous combination of references. Applicant's remaining arguments are based on the same disputed claim language. Examiner has found no additional prior art which teaches the disputed limitations found in independent claim 1, and also in independent claims 30 and 51. Therefore, the present application is in condition for allowance.

*Allowable Subject Matter*

Claims 1-68 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 1 recites a printer for printing time-based media. The printer receives time-based media and generates both a printed representation and an electronic representation. The printed representation includes a representation of the time-based media at a plurality of times thereof and a plurality of bar codes that associate time locations within the electronic representation with the plurality of times represented in the printed representation. Examiner has not found this combination of features in the prior art, particularly the recited association of time locations. The recited printer is advantageous since it allows a user to not only display an electronic representation of time-based media, but provide an encoded printout of elements of the electronic representation, such as key frames and time locations, that allow for easy access by the user.

The closest prior art is the previously cited combination of Narushima (US-6,774,951) in view of Kubota (US-2003/0084462) and Ishida (US-4,437,378) which fails to teach the recited association of time locations. Other relevant prior art includes Hoda (US-4,831,610) which teaches printed a bar code to access portions of electronic data stored on an encoded disk. However, Hoda also fails to teach an association of time locations, but rather teaches an association between the printed bar code representation and a section of the electronic data. The electronic media data is not necessarily time-based media and, even when a time-based format is used, is largely dependent on the rate of changing picture frames. Thus, the bar codes relate to portions of the electronic data and not particularly to time locations.

For the reasons stated above, independent claim 1 is deemed allowable.

Art Unit: 2625

Claims 2-29 each depend from claim 1, either directly or ultimately, and are therefore also deemed allowable at least due to their respective dependencies from an allowable claim.

Independent claim 30 recites a multifunction printer. Claim 30 includes the same features deemed allowable in claim 1. Accordingly, claim 30 is deemed allowable for the reasons given above for claim 1.

Claims 31-50 each depend from claim 30, either directly or ultimately, and are therefore also deemed allowable at least due to their respective dependencies from an allowable claim.

Independent claim 51 recites a method for printing time-based media. Claim 51 includes the same features deemed allowable in claim 1. Accordingly, claim 51 is deemed allowable for the reasons given above for claim 1.

Claims 52-68 each depend from claim 51, either directly or ultimately, and are therefore also deemed allowable at least due to their respective dependencies from an allowable claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
